- Problem Solving

Last Update: 30/Jan/2024

WORK EXPERIENCE

PHILIPS CLINICAL INFORMATICS

Entry Level Software Developer

Working since Jan/2022

I am a Junior Software Developer at Philips, specializing in Java, JavaScript, and PL/SQL. I work with the company's framework, using Windows and Git. Responsible for database queries and modifications, I follow quality standards and ISO 9001 norms. I use agile methodologies. I work in international management, because of it I can communicate in English, contributing to information security and software development in the team.

CLOUDPARK

Entry Level Software Developer

Sep/2021 - Dec/2021

Software Development Internship

Ago/2021 - Sep/2021

I was a Junior Full Stack Developer at CloudPark, responsible for cloud automation software. An expert in Python, HTML, CSS, SQL, JavaScript, TypeScript, and Shell Script, he used Angular and Django for quality solutions. He worked in Ubuntu, with Nginx and Supervisor, and utilized AWS services such as Cognito and S3. Experienced in Git and NFS-e, I developed Restful APIs, contributing in a dynamic and collaborative environment, focused on innovation for clients.

WK SISTEMAS

Software Development Internship

Apr/2021 - Jul/2021

I was chosen from over 600 candidates to join the software development team at WK Sistemas, after a rigorous selection process that included logic and programming tests. At the company, I learned C++, which is essential for creating robust systems, and I had contact with C#.

EXTRA INFO

I have a great tenacity for solving any problem, and my skills in computer science are growing daily. Currently, I am developing a personal website and sharing my knowledge with my colleagues.
